

## Huntfield Heights Pre- School

### Quality Improvement Plan 2016/2017

Following is a summary of what we are working towards in our site:

- Engagement in Learning
  - To engage and support parents to become more involved in their child's learning by encouraging them to have an input into their child's Individual Learning Plan each term.
  - We aim to arrange a time to meet with families to discuss their child and their learning needs.
  - We aim to encourage families to view and contribute to their child's folder as well as the group Floor-book.
- Sustainable Practice
  - We aim to set up and engage in some more sustainable practices within the preschool setting.
  - We are working towards establishing compost and recycling systems within the preschool that all of the children can engage and be involved with.
  - We will also source a 'visitor' to come and share some information about a range of sustainable practices.
- Physical Environment
  - To plan and work towards making some changes to the outdoor setting in the preschool.
  - Visit other sites to gather ideas. We hope to make some simple changes to begin with and some larger plans looking into the future.
  - Apply for grants that may be available as well as fundraising to support our needs.
